

Franz Rosenthal

Raised in New York until age 12, then lived between El Salvador and New York until entering and graduating high school in El Salvador. Attended Tulane University and earned a degree in Electrical Engineering in 1989 and a Master's in Business in 1991. Worked as a Plant Manager until 1998 and then changed careers and began working as an Engineer in an industrial setting, primarily in Oil and Gas. Have worked as a Lead Instrument Engineer at a steel manufacturing plant as well as at refineries.

My wife and I wanted to move to California to enjoy that all it has to offer. We relocated to the beautiful city of Benicia in 2018 after securing a position with the Valero Refinery.

Currently working as a Principal Instrumentation Engineer at a pharmaceutical manufacturing facility since 2022. Have lead several large-scale projects and been instrumental in implementing new work practices.

Currently happily married for 14 years to a breast cancer survivor. We have three children in the Benicia public school system, ages 5, 7, and 9. Have always supported diversity and inclusivity, and will continue to do so.

This is my first foray into public politics and I welcome the challenge and look forward to the opportunity to help.
